I am a Full-Stack Developer eager to collaborate in large projects. I have recently completed the University of Central Florida's Full-Stack Web Development bootcamp and I'm looking to make an impact in the workplace with my fast learning and creative problem-solving skills. I am excited to elevate my skills while working in a face-paced, team driven environment.

Projects

Wine&Dines - https://andrewrb22.github.io/-.theFederationOfCoders-/
Food and Wine pairing application built with HTML, CSS, and JavaScript. With Wine&Dines the user has the freedom to choose from four proteins to build a random recipe which will be paired with a group of wines that go well with this dish.

Bookmark - https://whispering-cove-53195.herokuapp.com/loggedin
Book searching application built with HTML, CSS, JavaScript, jQuery, Bulma, Node.js, Express, MySQL, and Sequelize. Bookmark targets people who love reading but don't know what to read. Search from over 2000+ books in our database.

SubAway - https://subaway.herokuapp.com/
Full-Stack single page application built with the MERN stack. With SubAway the user can manage their subscriptions to avoid overpaying for something they no longer use.

Education

August 2020 – November 2020
Full Stack Bootcamp • University of Central Florida • Orlando, FL

August 2012 – December 2015
Associate in Arts in Engineering • University of Central Florida • Orlando, FL
